Index

Volume 14, Numbers 1–6, February–December 1986

Absorption, acoustic, within human teeth during ultrasonic descaling, 2
Alginate impressions, surface roughness of dental stone casts from, 23
Amalgam condensation exercise, value of, in pre- and postgraduate education, 38
dental, standards for, 251
Anaesthesia, general, parenteral sedation and emergency drugs and equipment in general dental practice, 247
Anxiety, dental and regularity of dental attendance, 209
Arendorf T.: *see* Stafford G. D.
Aspirating systems, passive, two, comparison of, 180
Attendance, dental, dental anxiety and regularity of, 209
Automatic image analysis, feasibility of using, for measuring dental plaque *in situ*, 11

Barker G. R., Wastell D. G., Rothwell P. S. and Seifalian A.: Microcomputer methods for measuring the silent period of the masseter electromyogram after the jaw jerk reflex, 57
Battistuzzi P. G. F. C. M.: *see* Vrijhoef M. M. A.
Beynon A. D. G.: *see* Heasman P. A.
Biomechanics, *in vitro*, of lower molars with minimum Class II composite restorations, 130
Bond strength testing, tensile, treatment of results for, 165
Bosman F.: *see* Spierings Th. A. M.
Brookman P. J., Prosser H. J. and Wilson A. D.: A sensitive conductimetric method for measuring the material initially water leached from dental cements. 4. Glass-ionomer cements, 74
Burke F. J. T. and Watts D. C.: Weight loss of four calcium hydroxide-based materials following a phosphoric acid etching and washing cycle, 226

Calcium hydroxide-based materials, four, weight loss of, following a phosphoric acid etching and washing cycle, 226
Candidal colonization and properties of complete dentures, water immersion in, effect of overnight drying, 52
Cast, stone, dental, surface roughness of, from alginate impressions, 23
Cavity geometry, influence of, on heat transmission in restored teeth, 47
Cements, glass-ionomer, 4. A sensitive conductimetric method for measuring the material initially water leached from dental cement, 74
Centric occlusion disturbances, classification of, on the basis of intra-oral records, 65
Chow T. W., Clark R. R. F. and Cooke M. S.: The orientation of the occlusal plane in Cantonese patients, 262
Clark R. R. F.: *see* Chow T. W.
Class II composite restorations, minimum, *in vitro* biomechanics of lower molars with, 130
Cleaning procedures, patients', a laboratory simulation of: denture bleaching, 258
Clinical findings and subjective complaints, comparison of, in a group of temporomandibular joint patients. How reliable is your patient?, 223
Combe E. C. (ed.): Dental materials: 1983 literature review. Part 1, 93
Combe E. C. (ed.): Dental materials: 1983 literature review. Part 2, 139
Complete dentures, candidal colonization and properties of, effect of overnight drying and water immersion in, 52
Composite restoratives, posterior, investigation of the adequacy of interproximal matrices commonly used with, 84
Composites, posterior, light-cured, visible, development of surface hardness in, 169
radiopacity of, 178
Conductimetric method, sensitive, for measuring the material initially water leached from dental cements. 4. Glass-ionomer cements, 74
Cooke M. S.: *see* Chow T. W.
Craig D. C. and Rood J. P.: A comparison of two passive aspirating systems, 180
Crawford C. A., Lloyd C. H., Newton J. P. and Yemm R.: Denture bleaching: a laboratory simulation of patients' cleaning procedures, 258
Crown surface temperature measurement, diagnosis of tooth vitality by: a clinical evaluation, 160
Cumberbatch G.: *see* Woolgrove J.

Davidson C. L.: *see* Keuter F. M. S.
Dental materials: 1983 literature review. Part 1, 93
Dental materials: 1983 literature review. Part 2, 139
Dental practice, general, general anaesthesia, parenteral sedation, and emergency drugs and equipment in, 247
Dentine pins and root canal posts, some pre-formed, aspects of the metallography of, 218
Denture bleaching: a laboratory simulation of patients' cleaning procedures, 258
Dentures, upper, full, empirical and functional posterior palatal sealing of: a comparative study, 82
Denture-base material, use of nylon as, 18
materials, high impact strength, development of, 214
Descaler, ultrasonic, performance of, inherent variability of, 126
Descaling, ultrasonic, acoustic absorption within human teeth during, 2
Detergent preparations of triclosan and chlorhexidine, disinfection of dental surgeons' hands with, 7

Diagnostic procedure in human teeth, temperature measurement as, feasibility of, 126
Disinfection of dental surgeons' hands with detergent preparations of triclosan and chlorhexidine, 7
Drugs, emergency, general anaesthesia, parenteral sedation and equipment in general dental practice, 247
Dummer P. M. H. and Gidden J.: The Maryland bridge: a useful modification, 42

Editorial, 1
Education, pre- and postgraduate, value of an amalgam condensation exercise in, 38
Elderly and the dental profession in the USA—a case of mutual need, 34
Electromyogram, masseter, microcomputer methods for measuring the silent period of, after the jaw jerk reflex, 57
Electrostimulation in the treatment of pain in the mandibular dysfunction syndrome, 62
Etching, phosphoric acid and washing cycle, weight loss of four calcium hydroxide-based materials following, 226
